Abstract not available for AU8744198

Abstract of corresponding document: **US6060149**

A disposable wiping article is disclosed. The disposable wiping article has at least two layers. The first layer has a wet extensibility greater than that of the second layer. The first layer can be an apertured, dry creped web of cellulosic fibers, and the second layer can be a nonwoven web comprising synthetic fibers. Selected portions of the first layer are bonded to the second layer to inhibit wet extension of the first layer in the plane of the first layer.
